MAHIMA KUMARI

QA ANALYST

+91 9304718797	mahimayadowansi@gmail.com	linkedin.com/in/mahima-kumari27	New Delhi, India

SUMMARY

Software QA Engineer with hands-on experience in both manual and automation testing. Proficient in Java, Selenium WebDriver, TestNG, JMeter, Postman, HTML, and JavaScript. Proven ability to design and execute comprehensive test cases, perform API load testing, and identify critical issues to improve software quality and reliability.

SKILLS

Testing: Manual Testing, Automation Testing, API Testing (REST), Integration Testing, Regression Testing, Smoke Testing, Functional Testing, SDLC, STLC
Languages: Java, JavaScript, Python
Databases: MySQL
Tools & Platforms: Postman, Apache JMeter, Jira, Git, Jenkins, Maven, Microsoft Azure DevOps
Automation Frameworks: Selenium WebDriver, TestNG
Others: Agile/Scrum methodologies, Cross-browser Testing, Responsive UI Testing

WORK EXPERIENCE

ISOURSE TECHNOLOGIES (May 2025 - Present)
QA Analyst

GIG Eco Onboarding Platform

- Performed **manual, automation, and API testing** across multiple web-based applications to ensure high-quality software delivery.
- Designed and executed a manual test suite with over **270+ test cases**, improving coverage for business-critical workflows like employee onboarding.
- Automated the Eco Onboarding Platform (used by **Blinkit** and **Swiggy** to onboard employees) using **Selenium WebDriver, TestNG, and Page Object Model (POM)**, reducing test execution time by 70%
- Used **Azure DevOps** for test automation execution using azure devops pipeline and issue tracking using Azure Repos and Azure Boards

Isourse CRMS

- Conducted **functional, regression, and integration testing** for the Isourse CRMS tool to ensure end-to-end workflow integrity, including task creation, assignment to employees, status tracking via dashboard, and email notifications.
- Executed **UI** and **user acceptance testing (UAT)** for Isourse CRMS, identifying and reporting over ~**57 issues** that enhanced product stability.
- Utilized **Postman for API** validation and **JMeter** for basic performance/load testing of CRMS APIs

Isourse HRMS

- Created and maintained a comprehensive **manual testing suite with 190+ test cases**, covering core HR functionalities including hiring, attendance and leave, employee exit etc.
- Performed detailed functional, UI, and UAT testing, ensuring accurate business logic across various user roles and workflows.
- Validated backend APIs using Postman and ensured data consistency across modules.

PERSONAL PROJECT

Naukri App – Automation & Performance Testing Project

- Developed a robust automation framework for the Naukri web application using **Selenium WebDriver, TestNG, and Maven, following the Page Object Model (POM)** to ensure modularity and maintainability.
- Conducted detailed functional and UI testing across critical workflows, including login, job search, job application, profile updates, resume uploads, and logout.
- Executed performance testing using **Apache JMeter** and **BlazeMeter**, evaluating system behavior under varied load conditions and identifying performance bottlenecks.
- Integrated the automation suite with **Jenkins**, enabling continuous integration and automated test execution on code changes.

Evil Tester – API Automation & Integration Challenge

- Designed and implemented an automated REST API testing framework in Postman, focusing on response validation, error reporting, and status code accuracy to ensure API reliability.
- Validated **22 REST API** endpoints, performing end-to-end testing including edge cases, error scenarios, and data consistency checks.
- Integrated **Jira REST API for automated issues creation on failed assertions**, enhancing bug tracking and team collaboration.
- Connected the **Postman** collection to **Jenkins**, automating API test runs on a scheduled basis and generating detailed execution reports.
